Education

Emory University, Atlanta, Georgia, USA
Doctor of Philosophy, Department of Mathematics, expected in May 2028
Master of Science, Department of Computer Science, expected in May 2025

Tufts University, Medford, Massachusetts, USA
Master of Science, Department of Mathematics
Concentration: Computational and Applied Mathematics
Advisors: Professor Misha Kilmer, Professor Xiaozhe Hu
Thesis: A Tale of Two Tensors: Using Hierarchical and Block Low Rank Matrices to Make Preconditioners and Save Storage

Cornell University, Ithaca, New York, USA
Bachelor of Science, *Department of Biological Engineering*, December 2020
Concentration: Computational Biological Engineering
Minors: Pure Mathematics, Applied Mathematics
Advisor: Professor Buz Barstow
Senior Thesis: Designing and Optimizing a Protocol for Whole-Ovary Vitrification

Research Interests

Numerical Linear Algebra

Scientific Computing

Numerical Partial Differential Equations

High Performance Computing

On-going research

Structured matrices, arising from the abstraction of real world physical systems modelled by discretized fractional partial differential equations, are prevalent in fluid dynamics, computational finance, and image processing. Current ways to store and solve problems using these matrices can be slow. My current reseach is interested in finding ways that exploit hidden structure so that we can minimize storage and computational time. More technical research topics include: multilinear algebra, tensor-based decomposition, fractional PDEs, and preconditioning.

Conferences, Workshops and Talks

Invited Talks:

- *Discovering Hierarchical Matrix Structure Through Recursive Tensor Decomposition*: Joint Mathmatics Meeting, Boston, MA, January 4, 2023.
- *It's Tensor Time!: A Computational Framework for Analyzing Structured Matrices*: Tufts Organization of Graduate Students in Mathematics, Medford, MA, Sept. 12, 2022.
- *Representation Schemas for Visualizing Quantum Algoroithms*: Quantum Computing Reading Group, Medford, MA, April 11, 2022.
- *Special Families of Matrices used in Quantum Algorithms*: Quantum Computing Reading Group, Medford, MA, February 28, 2022.

Workshops and Conferences Attended

- Acceleration and Extrapolation Methods, ICERM, Providence, RI, July 24-28, 2023.
- Qiskit Global Summer School 2023: Theory to Implementation July 17-28,2023
- Joint Mathmatics Meeting, Boston, MA, January 4-7, 2023.
- Geometry and Analysis Seminar for Boston Area Graduate Students, Massachusetts Institute of Technology, Cambridge, MA, October 29-30, 2022
- Qiskit Global Summer School 2022: Quantum Simulations July 18-29,2022

- Geometry and Analysis Seminar for Boston Area Graduate Students, Massachusetts Institute of Technology, Cambridge, MA, November 6-7, 2021

Teaching Experience

Tufts University

Teaching Assistant

- Math 126 - Numerical Linear Algebra (Spring 2023)

Directed Reading Program Mentor

- Intoduction to Mathematical Control Theory (Fall 2022)

Course Assistant

- Math 125 - Numerical Analysis (Fall 2022)
- Math 32 - Calculus I (Spring 2022)

Cornell University

Undergraduate Teaching Assistant

- BEE 2600 - Introduction to Biological Engineering (Fall 2018)

Honors and Awards

The Fuertes Medal Memorial Prize for Public Speaking,
Cornell University, College of Engineering, 2020.

Tufts University, Department of Mathematics Scholarship,
$20,000 for AY 2022-2023

Tufts University, Graduate School of Arts and Sciences
Research Conference Grant $600 for AY 2022-2023

Memberships

American Mathematical Society (AMS)

Society for Industrial and Applied Mathematics (SIAM)

Spectra!

Departmental Service

Member: Tufts Organization of Graduate Students in Mathematics, 2021-2023.

Member: Society for Industrial and Applied Mathematics, Tufts University Chapter, 2021-2023.

Relevant Courses

Tufts University

- Mathematical Modeling, Real Analysis I-II, Abstract Algebra I, Numerical Analysis, Partial Differential Equations I-II, Real and Complex Analysis

Cornell University

- Numerical Linear Algebra, Chaos and Nonlinear Dynamics, Game Theory, Computational Algebra, Applied Complex Analysis, Partial Differential Equations, Fluid Mechanics, Number Theory, Heat and Mass Transfer, Probability and Statistics, Calculus I-III, Linear Algebra, Ordinary Differential Equations

Language Skills

English: native speaker

French: reading proficiency, basic conversation

Programming: Matlab, Julia, Python(specific packages include: NumPy, pandas, scikit-learn, qiskit, SciPy), Rstudio, Mathematica

Computer: LaTeX, Microsoft Office, HTML
